Lago	lago ou lagôa	lake
Laguna	lagoei a	pond
Morro, morros	morro, morros	bluff, bluffs
Pampa	pampa	grassy plains
Salto	salto	water fall

PRONUNCIATION AND TRANSCRIPTION

Portuguese	English
b	like English b.
c	before e and i, soft; before a, o, u, l and r, hard; before t, usually silent.
ç	soft as in French.
ch	like ks before e and i; otherwise like single c.
ch	before vowels, like sh, except in some words derived from Latin and Greek; before consonants like k.
h	usually silent.
j	as in French.
lh	like lli in 'brilliant'.
m and n	nasal at end of word or syllable.
nh	like ny in 'canyon'.
p	as in English, but usually silent before t.
ph	like f.
qu	like k.
r	trilled after l, m, n, s, or when initial or double.
s	usually soft, but like English z when between two vowels.
th	like t.
x	usually like sh, but exceptions are numerous.

Vowels as in all Romance Languages, but "a" and "o" have also nasal sounds (indicated by the ~). These and the nasal diphthongs approach Frerch values. In other diphthongs the vowels are pronounced separately but are slightly abbreviated. There is no brief rule for accent as in Spanish.

Spanish (in America) Vowels as in all Romance Languages.	English	Indian.
b and v	identical; non explosive, almost like English v.	As far as possible Indian names are transcribed according to Spanish usage; but since the Indian tongues are rich in gutturals, the conventional transcription—kh—of the Turkish guttural as in 'Khan' has been used to express them.
c	before e and i soft; before a, o, u, or another consonant, hard.	
ch	as in 'church'.	
d	like th in 'that'.	
g	before e and i like aspirated h; before a, o, u, hard.	
h	always silent.	
j	like aspirated h.	
ll	like lli in 'brilliant'.	
n	like ny in 'canyon'.	
qu	like k.	
rr	strongly trilled.	
s	always sharp.	
z	like sharp s.	

Accent falls on the penult of names ending in a vowel, or n or s; on the last syllable of other words. Names varying from this rule carry a written accent to indicate the syllable to be stressed.
