

SEMINÁRIO DE EQUAÇÕES DIFERENCIAIS PARCIAIS

SUMÁRIO

SUMÁRIO

1

Extension theory approach in stability of standing waves for NLS equation with point interactions

2

A mathematical analysis of a model for phase transitions of thermoviscoelastic isochoric materials

3

Resultados do tipo Ambrosetti-Prodi para uma classe de problemas elípticos

4

Singularidades Quânticas

5

A parabolic-elliptic Keller-Segel system with critical mass in any space dimension

6

Técnicas de C^* -álgebras no estudo do índice de problemas de valor de fronteira

7

Teoria de Escalas Temporais e suas aplicações

8

The effect of signal on the scalar Chen-Simons equation

SUMÁRIO

9

Hydrodynamic Vortex on Surfaces

10

Radial sign-changing solutions to biharmonic nonlinear Schrödinger equations

11

Operadores auto-adjuntos "exóticos" e genéricos

12

Soluções positivas para equações assintoticamente lineares via Variedade de Pohozaev

13

Variational problems involving nonlocal fractional operators

14

Nonlinear Schrödinger equation with time dependent potential: large time properties

15

Symmetry breaking and Morse index of solutions of nonlinear elliptic problems in the plane

16

Delta shock wave for a 3×3 hyperbolic system of conservation laws

SUMÁRIO

- 17** Pseudodifferential operators on local Hardy spaces
- 18** Global nonlinear stability for some steady solutions of three-dimensional incompressible Euler equations with helical symmetry and in the absence of vorticity stretching
- 19** On the fractional Yamabe problem
- 20** Multiplicidade de soluções para as equações de Chern-Simons-Schrödinger
- 21** Detection and imaging in strongly backscattering randomly layered media
- 22** A positive mass theorem for asymptotically flat manifolds with a non-compact boundary
- 23** Regularity theory for time dependent mean-field games with logarithmic nonlinearities
- 24** Large and entire large solutions for a class of quasilinear elliptic systems

SUMÁRIO

25

Comportamento das constantes de Sobolev e de suas funções extremais

26

Controlabilidade nula de um sistema parabólico com não-linearidade não-local

27

Ill-posedness of some model equations for water waves

28

Optimal regularity of the solution and an epiperimetric inequality approach to the regularity of the free boundary in the Signorini problem
